PROFILE

Software Engineer and Technical Delivery Specialist with 8+ years of professional experience in mobile applications, enterprise systems, product operations, and software releases. Bridges business and technical teams by translating requirements into actionable work, coordinating delivery, resolving issues, and improving process reliability. Brings strong stakeholder communication, structured problem-solving, and end-to-end ownership.

EMPLOYMENT HISTORY

Software Engineer / Product Support Specialist

Euroland.com AB | Jun 2023 – Jul 2026

- Handled end-to-end delivery (requirements gathering, development handover, QA, release) for 110+ investor relations app clients as Product Support Specialist, then built and released 30+ white-label React Native apps as Software Engineer with end-to-end ownership
- As Product Owner, drove feature upgrades including React Native version upgrades, UI/UX improvements, module enhancements, and VAPT security testing; led the IR App v3 rollout to ~90% of the client portfolio, including new features like a revamped watchlist, AI podcast, and AI Search
- Served as cross-team liaison (Sales, QA, Development, Client Support), running sprint planning, biweekly alignment meetings, and weekly standups to prioritize delivery and resolve production issues

Application Development Analyst / Associate

Accenture Inc. | Jun 2021 – Oct 2022

- Supported a Canadian client's SAP PM and MDG processes as Application Development Associate then Analyst, resolving application issues, implementing new features, and customizing SAP PM modules in coordination with FI/CO, MM, PP, and QM teams
- Served as liaison between corporate and operational stakeholders and provided on-call support to maintain continuity across client environments

Manufacturing Product Engineer

Texas Instruments | Dec 2019 – Dec 2020

- Analyzed test results across 6 IC product lines and drove root-cause corrective actions, reducing defects by 3% and improving yield by 5%
- Audited production processes and modified automated testing systems with cross-functional teams to strengthen quality control and process efficiency

Software Developer Intern

Texas Instruments | Jun 2018 – Jul 2018

- Built and tested a Spring-based Java application (HTML/CSS, SQL, Maven, Tomcat, JUnit) to support a manufacturing machine product line, improving data handling and workflow reliability

Content Analyst

TaazaCoupons | Apr 2014 – Dec 2016

- Managed and maintained accuracy across 350+ merchant listings (1,750+ associated coupons) in online stores, applying SEO best practices that drove ~3x traffic growth
- Produced social media content across Twitter, Facebook and Instagram, and standardized advertising copy and promotional imagery (Photoshop) to ensure consistent brand and content quality company-wide
